Anisha Catherine Jose

(Tech-savvy, Software Developer, problem Solver)

PROFILE

Seeking a challenging Software Developer position to leverage my technical skills in MySQL, C, Python, CSS, and HTML, and passion for creating innovative web solutions.

SKILLS

Programming Languages: C,Java, DBMS,JavaScript(beginner),Python,Flask(beginner)
Web Development: HTML5,CSS3
Database Management: MySQL
Web Development Tool:Visual Studio Code
Soft Skills: Problem-solving,Hardwork, Teamwork, Time Management, Communication

EDUCATION

BTech in Computer Science Engineering **2021-2025**
APJ Abdul Kalam Technological University (KTU), Kerala, India
2025-present
CGPA: 7.55

Higher Secondary Education **June 2019 - March 2021**
Government Higher Secondary School (GHSS) Cheemeni, Kerala, India
Percentage: 91.4%

SSLC **June 2018 - March 2019**
Government Higher Secondary School (GHSS) Kuttamath, Kerala, India
Percentage: 98%

PROJECT:

Wrong-Way Vehicle Detection Using Kalman Filter and YOLO August 2024
Tools: Python, OpenCV, YOLO, Kalman Filter, NumPy
Description: Designed a system to detect and predict vehicles moving in the wrong direction. Utilized YOLO for object detection and Kalman Filter for tracking and motion prediction. The system analyzes vehicle trajectories to determine if a vehicle is in the wrong way, ensuring high accuracy in real-time video processing.

Weather WebApp | LINK january 2025
Tools: HTML, CSS, JavaScript, OpenWeather API
Built a responsive weather app with city-based search and geolocation support. Integrated API requests using Promises and handled errors gracefully. Features include unit toggling (°C/°F), real-time weather details, and a mobile-friendly UI.

Culprit Face Identification System February2024 - May2024

Languages and Tools: Python, OpenCV, CSV

Description: Designed and implemented a criminal identification system to assist law enforcement agencies in identifying suspects by matching crime scene images/videos against a pre-stored database of known offenders, achieving up to 99% accuracy.

INTERNSHIP & WORKSHOPS

Internship in Embedded Systems & Robotics May 2023

Techmaghi, Bala Startup Mission,kerala

Description: Gained hands-on experience with industry-standard tools and technologies, including Arduino for microcontroller programming and hardware interfacing.

Big Data and Hadoop Workshop October 2022

TATHVA 22, National Institute of Technology Calicut

Workshop on Web Mining May 2022

Organised by IEEE Student Branch

Volunteer Experience April 2023

National Level Techfest INQUA'23, Volunteer

MOOCS

Certificate on Database Management System January –March 2024

NPTEL Online Certification (Funded by the MoE, Govt. of India)

Score: 68%
